## A bibliography of research on the geography of South Australia: 2008-2009

ALARIC MAUDE<sup>1</sup>

This bibliography lists research articles and book chapters published in 2008 and 2009 that examine aspects of the physical and human geography of South Australia. Items have been selected for inclusion on the basis of their contribution to an understanding of South Australian environments, regions and places; society-environment relationships; and the role of place. Some items missed in the previous bibliography for 2006-2007 are also included. The bibliography is based on searches of the electronic bibliographic databases *Scopus*, *Informit* and *Libraries Australia*, and the authors come from a variety of disciplines. The author would be grateful to be advised of any significant omissions, as no bibliography can ever be complete. The bibliography will be continued as an occasional account of research in subsequent issues of this journal.
