- 46 A leather dispatch bag, used by John Lewis (1842-1933) during construction of the Overland telegraph, used as a pony express service, complete with Government Issue Padlock, 24cm by 30cm.
- R46 A leather dispatch bag, used by John Lewis (1842-1933) during construction of the Overland telegraph, used as a pony express service, complete with Government Issue Padlock, 24cm by 30cm.
- 47A & B A sword, of Asiatic origin, in poor condition, 19th Century, missing hilt and scabbard. Note : This sword is not of the quality that would have been used by Colonel W. Light
- 48 A number of sloppy bricks, from the Thebarton cottage of Col. William Light.

49 Compass Detail - A Troughton and Sims Improved Level, 14", housed in a wooden box, bearing a brass plaque marked Light, with accessories including, screw cap, plumb bob, a black glass filter, and an eyepiece. This item has proven difficult to value. Research indicates that it is theoretically possible that the level may have belonged to William Light on the basis of its age. However the provenance relating to his ownership is at best tenuous, as it relies on a letter which in turn relies on hearsay of the selling agent. Further investigation is required to prove the fact that the level belonged to W. Light. An inventory may exist in the Government archives as to the equipment used by Light. Probate records would exist not only for Light but also of his descendants which may mention this type of level. Accounts by Light's assistants may make passing mention of the type of equipment used by Light. Consequently I have valued the item on firstly the basis it did belong to Light and was used in the surveying of Adelaide and secondly on the basis that it is a level with no pr

|---------|--|---------|
| 81 | A Colonial table, Casuarina, made by J. McDoull Stuart while staying at Green P pTatch near Port Lincoln in 1854, having a rectangular top, plain frieze, supported on 4 tapering square form legs, 94cm by 56cm by 72cm. | |
| 84 | A slab of wood, Hemicyclia sepiana, from the J. McD. Stuart tree, the last tree encountered on the crossing of the continent at Chambers Bay, N. T., 51cm by 35cm. | |
| 85A & B | Rounds of Tree branch, from J. McD. Stuart's Tree, bearing "JMDS 1862" carved by a member of the expedition | On loan |
| 85C | A Branch of the J. McD Stuart Tree located at Chambers Bay, N.T., 45cm long | |
| 86 | Bark from a mangrove tree, gathered at Chamber's Bay, under which J. McD Stuart buried a number of documents | |
| 87A | A Photograph of J. McD. Stuart's tree, having a wooden frame incorporating wood from J. McD Stuart's Tree. | |
| 87B | A large plaster marquette, depicting John McDougall Stuart, by Adelaide Sculptor W.J. Maxwell 1905, 50cm by 49cm, 140cm high
Note : A full scale version of this statue, executed by another sculptor in marble is located in Victoria Square. | |
| 88A&B | Part of J. McD. Stuart's Tree, fitted into a custom made box made by Apprentices at the Adelaide Technical School, taken into space in 1996 by NASA's Dr Andy Thomas. | |
| 93 | A small trade cannon, cast iron, bearing no proof marks, on a later marine gun carriage, the cannon being 81cm long. Provenance : This cannon by repute is one used by Charles Sturt on his expedition along the River Murray. The cannon was obtained from the Johnson property located near Mildura where Sturt's cannon was allegedly left. However literature exists which documents that the former owner of this property was a collector of cannon, indicating that he had quite a number. So even had Sturt had a cannon, which was left at the Johnson property, it is quite probable that this cannon is merely another from the collection. | |
