

GeoNews Index From May 1994

The index of the Society's members' newsletter started as an alphabetical index and subsequently added to as readable copies of the publication from April 2011.

There have been two reviews on the style and content since 1994, with the consensus that due to costs, the format remains.

The content is under review through the Publications Committee, who has delegated Council responsibility for its publication.

Searchable.

Prior to May 1994 the newsletter was in a different format and style.
